 Full-time

Connect the world of tomorrow.

You love it when precise plans become ton-heavy structures? Then shape the future of energy supply – as a **Structural Drafter (m/f/d) – Foundations**.

Cteam is a leading service provider in the German and European power and mobile network sector. With around 1.900 employees from over 61 nations, we are a reliable partner for engineering, overhead line construction, mobile communications and mobile ground protection.

What we offer

- Attractive compensation with bonus scheme and 13th monthly salary (Christmas bonus)
- Structured onboarding with a targeted induction program and individual onboarding plans
- Working at eye level in an open first-name culture throughout the entire company
- Company pension scheme and group accident insurance from the very first day
- Health and benefits are our priority: Via our cafeteria system, you can flexibly choose from offerings such as supplemental health insurance, corporate fitness with EGYM Wellpass, a prepaid benefit card, or bicycle leasing
- Individual training and development opportunities
- The opportunity to actively shape the future of energy infrastructure

Your task

- You will contribute to the planning of foundations for overhead line and mobile communication towers for new constructions and existing structures.
- You will create 2D and 3D models and all required technical documents, such as reinforcement drawings for various types of foundations.
- Reviewing and quality assurance of planning and design documents are also part of your responsibilities.
- You will work closely with team leaders, project managers, structural engineers, and technical drafters and actively communicate within the project team.
- You will contribute to the development and optimization of technical solutions.

Your profile

- Successfully completed vocational training as a Construction Drafter / Technical Drafter / Technical Systems Planner (m/f/d) or a comparable qualification
- Practical experience (+2 years) in the technical processing of demanding 2D and 3D constructions including formwork plan and rebar drawings, ideally with AutoCAD or Allplan
- Intermediate - Good German language skills and willingness to improve those skills.

- Team player with a structured and self-organized working style

Competence die verbindet!
